Hello TA,

I thought I submitted my code last night along with my report, but it turned out that I must have clicked the testing instead of the submission one. I submitted my code immediately after I noticed it (just now, when I'm using gradescope again).

As you could see from canvas that my report was submitted last night, and that was the time I intended to submit everything. You could see from my p1 and p2 that I usually complete projects early. P3 really got me, that's why I submitted it just few hours before the deadline. I was wondering if you could kindly accept my late submission of the code, I didn't meant to delay.

Thank you very much!

Fanrui

Hi Fanrui,

Yes, we can accept this however please be careful with the directions and deadlines. Attention to detail is critical throughout the course and we cannot make any more exceptions going forward.

If for any reason your report is not processed by the grading TA you will need to raise a regrade request and reference this post.

Thanks,

Gary
